

TrueType

```
classDiagram
    class TrueType
    class ros_message_traits["ros::message_traits"]
    ros_message_traits --|> TrueType
```

The diagram illustrates a class hierarchy. At the top is a class box labeled 'TrueType'. It has a header section and two empty body sections. Below it is a larger, shaded class box representing 'ros::message\_traits'. The top section of this box contains the text 'ros::message\_traits', '::HasHeader< ::conti', '\_radar::Measurement\_', and '< ContainerAllocator > >'. Below this are two more empty sections. A blue arrow with an open triangular head points from the top of the 'ros::message\_traits' box to the bottom of the 'TrueType' box, indicating that 'TrueType' inherits from 'ros::message\_traits'.

ros::message\_traits  
::HasHeader< ::conti  
\_radar::Measurement\_  
< ContainerAllocator > >
