

TrueType

```
classDiagram
    class TrueType
    class ros_message_traits["ros::message_traits"]
    ros_message_traits --|> TrueType
```

The diagram illustrates a class hierarchy. At the top is a class box labeled 'TrueType'. Below it is a larger class box for 'ros::message\_traits'. A blue arrow with an open triangular head points from the 'ros::message\_traits' box up to the 'TrueType' box, indicating that 'TrueType' inherits from 'ros::message\_traits'. The 'TrueType' box is divided into three horizontal sections, with the top section containing the class name. The 'ros::message\_traits' box is divided into three horizontal sections; the top section contains the class name and its template arguments, while the bottom two sections are empty.
